spot on.

Fleas

Ticks

Ear mites

Roundworms

Tapeworms

Boehringer
Ingelheim

Who knew...?

68%
of cats need
monthly
worming.¹

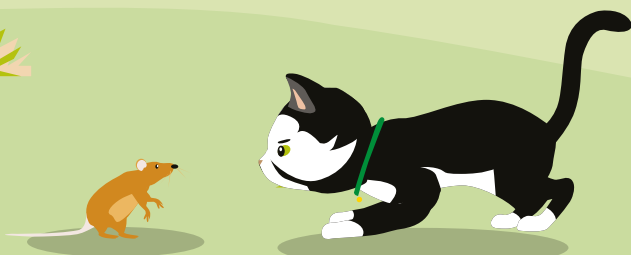

Only one monthly
parasiticide **protects[†]**
cats against mixed
infections, including
tapeworms^{**}

NexGard[®] COMBO is the fiercely protective monthly parasiticide designed to provide cover for cats from the age of 8 weeks and weighing 0.8 kg against 10 key parasites, including fleas, ticks, ear mites, tapeworms and roundworms*.

NexGard[®] COMBO is:

- ✓ easy to give
- ✓ alcohol free
- ✓ available in just two pack sizes

Read on to find out more – including the importance of monthly worming. You may be surprised.

NexGard[®] COMBO – delivering broad protection[†]

NexGard[®]
COMBO
is easy to give
and alcohol
free.

Just one spot on provides broad spectrum parasite cover against these key parasites* that can be used on a monthly basis.

Fleas

The No.1 parasite concern for pet owners². NexGard[®] COMBO kills them within 24 hours³.

Roundworms

1 in 4 UK cats are shedding roundworm eggs⁴. A cat's lifestyle can expose them to risk of mixed infection; therefore, approximately 68% of UK cats have a relevant risk factor that makes monthly deworming necessary¹. Quarterly worming gives the opportunity for *Toxocara* spp. to reach patent infection and shed more eggs.

Ticks

An ever-present outdoor threat that can transmit disease to humans. NexGard[®] COMBO kills them within 48 hours.

Tapeworms

Hunting and grooming both put cats at risk from tapeworm infection, and most cases get missed in routine faecal tests⁷. NexGard[®] COMBO is the only monthly treatment that also covers tapeworms. Tapeworms are zoonotic and are therefore also a risk to humans.

Ear mites

Around 80% of cat otitis externa cases are caused by ear mites⁵. NexGard[®] COMBO has 97.2-99.9% efficacy after one treatment⁶.

Also covers

Notoedric mange

Bladderworms

Hookworms

Lungworms

Heartworms

The benefits to your practice

Feline parasite protection is an important part of your practice; you're providing a vital health service to cats, their owners and the local community, so you need a parasiticide you can not only trust, but one that works for your patients and their owners.

Easy for cat owners

87% of cat owners say that the NexGard® COMBO syringe applicator looks professional and medicinal⁸, a step up from retail brands. 80% of owners say the applicator is easy to use⁸. And as NexGard® COMBO is alcohol free, it avoids the uncomfortable cold sensation when it touches their cat's skin.

Easy for you

As this parasiticide protects your feline patients against so many key parasites[†], your practice will benefit from simplified stock control, easier compliance and clear parasite protocols.

Ideal for kittens...

NexGard® COMBO can be used to protect kittens from just 8 weeks old and 0.8kg, so it can be administered to most at their first vaccination. Plus, with just two pack sizes, you only need to change the prescription once when they become adults. ESCCAP recommends monthly roundworming of kittens from weaning until 6 months old⁹.

We can supply a kitten support pack to help bond new kitten owners to your practice.

...and breeding queens.

NexGard® COMBO can be used in breeding, pregnant and lactating queens, so they can always be protected from key parasites.

NexGard[®] COMBO

FIERCELY PROTECTIVE

Available in 2 pack sizes: 0.3ml for cats weighing less 2.5kg and 0.9ml for cats weighing more than 2.5kg (which covers the majority of cats).
